THEY TRUST US WITH THEIR EVENTS

What they say

89%
NPS

'Our delegates had a great check-in experience with fielddrive, we received excellent feedback from our attendees.'

Adam Clay, Director of Finance
Royal Microscopic Society

'I am a big fan of how advanced and innovative the fielddrive kiosks are.'

Jerome FOHET, Marketing Director
Global Foundries

'Facial recognition at our Congress provided an innovation that integrated nicely with our registration.'

Annalisa Ponchia Baccara, CEO of ESOT
European Society for Organ Transplantation

THE DRIVING FORCE

Our Management Team

Experience and passion

Our management team has a combined experience of over 50 years in the meeting, events and technology industry

Danny Stevens – CEO

More than 30 years experience in Event Industry. Sold his Event Agency in 2014, then setup fielddrive to focus full time on Event Technology solutions.

Denis Pilet – COO

Extensive experience in managing team/departments - broad field of expertise. Master in Business Administration.

Pascal Lagadec – Head of Sales

Extensive experience in International Sales and Business Development, mostly in Event Technology.

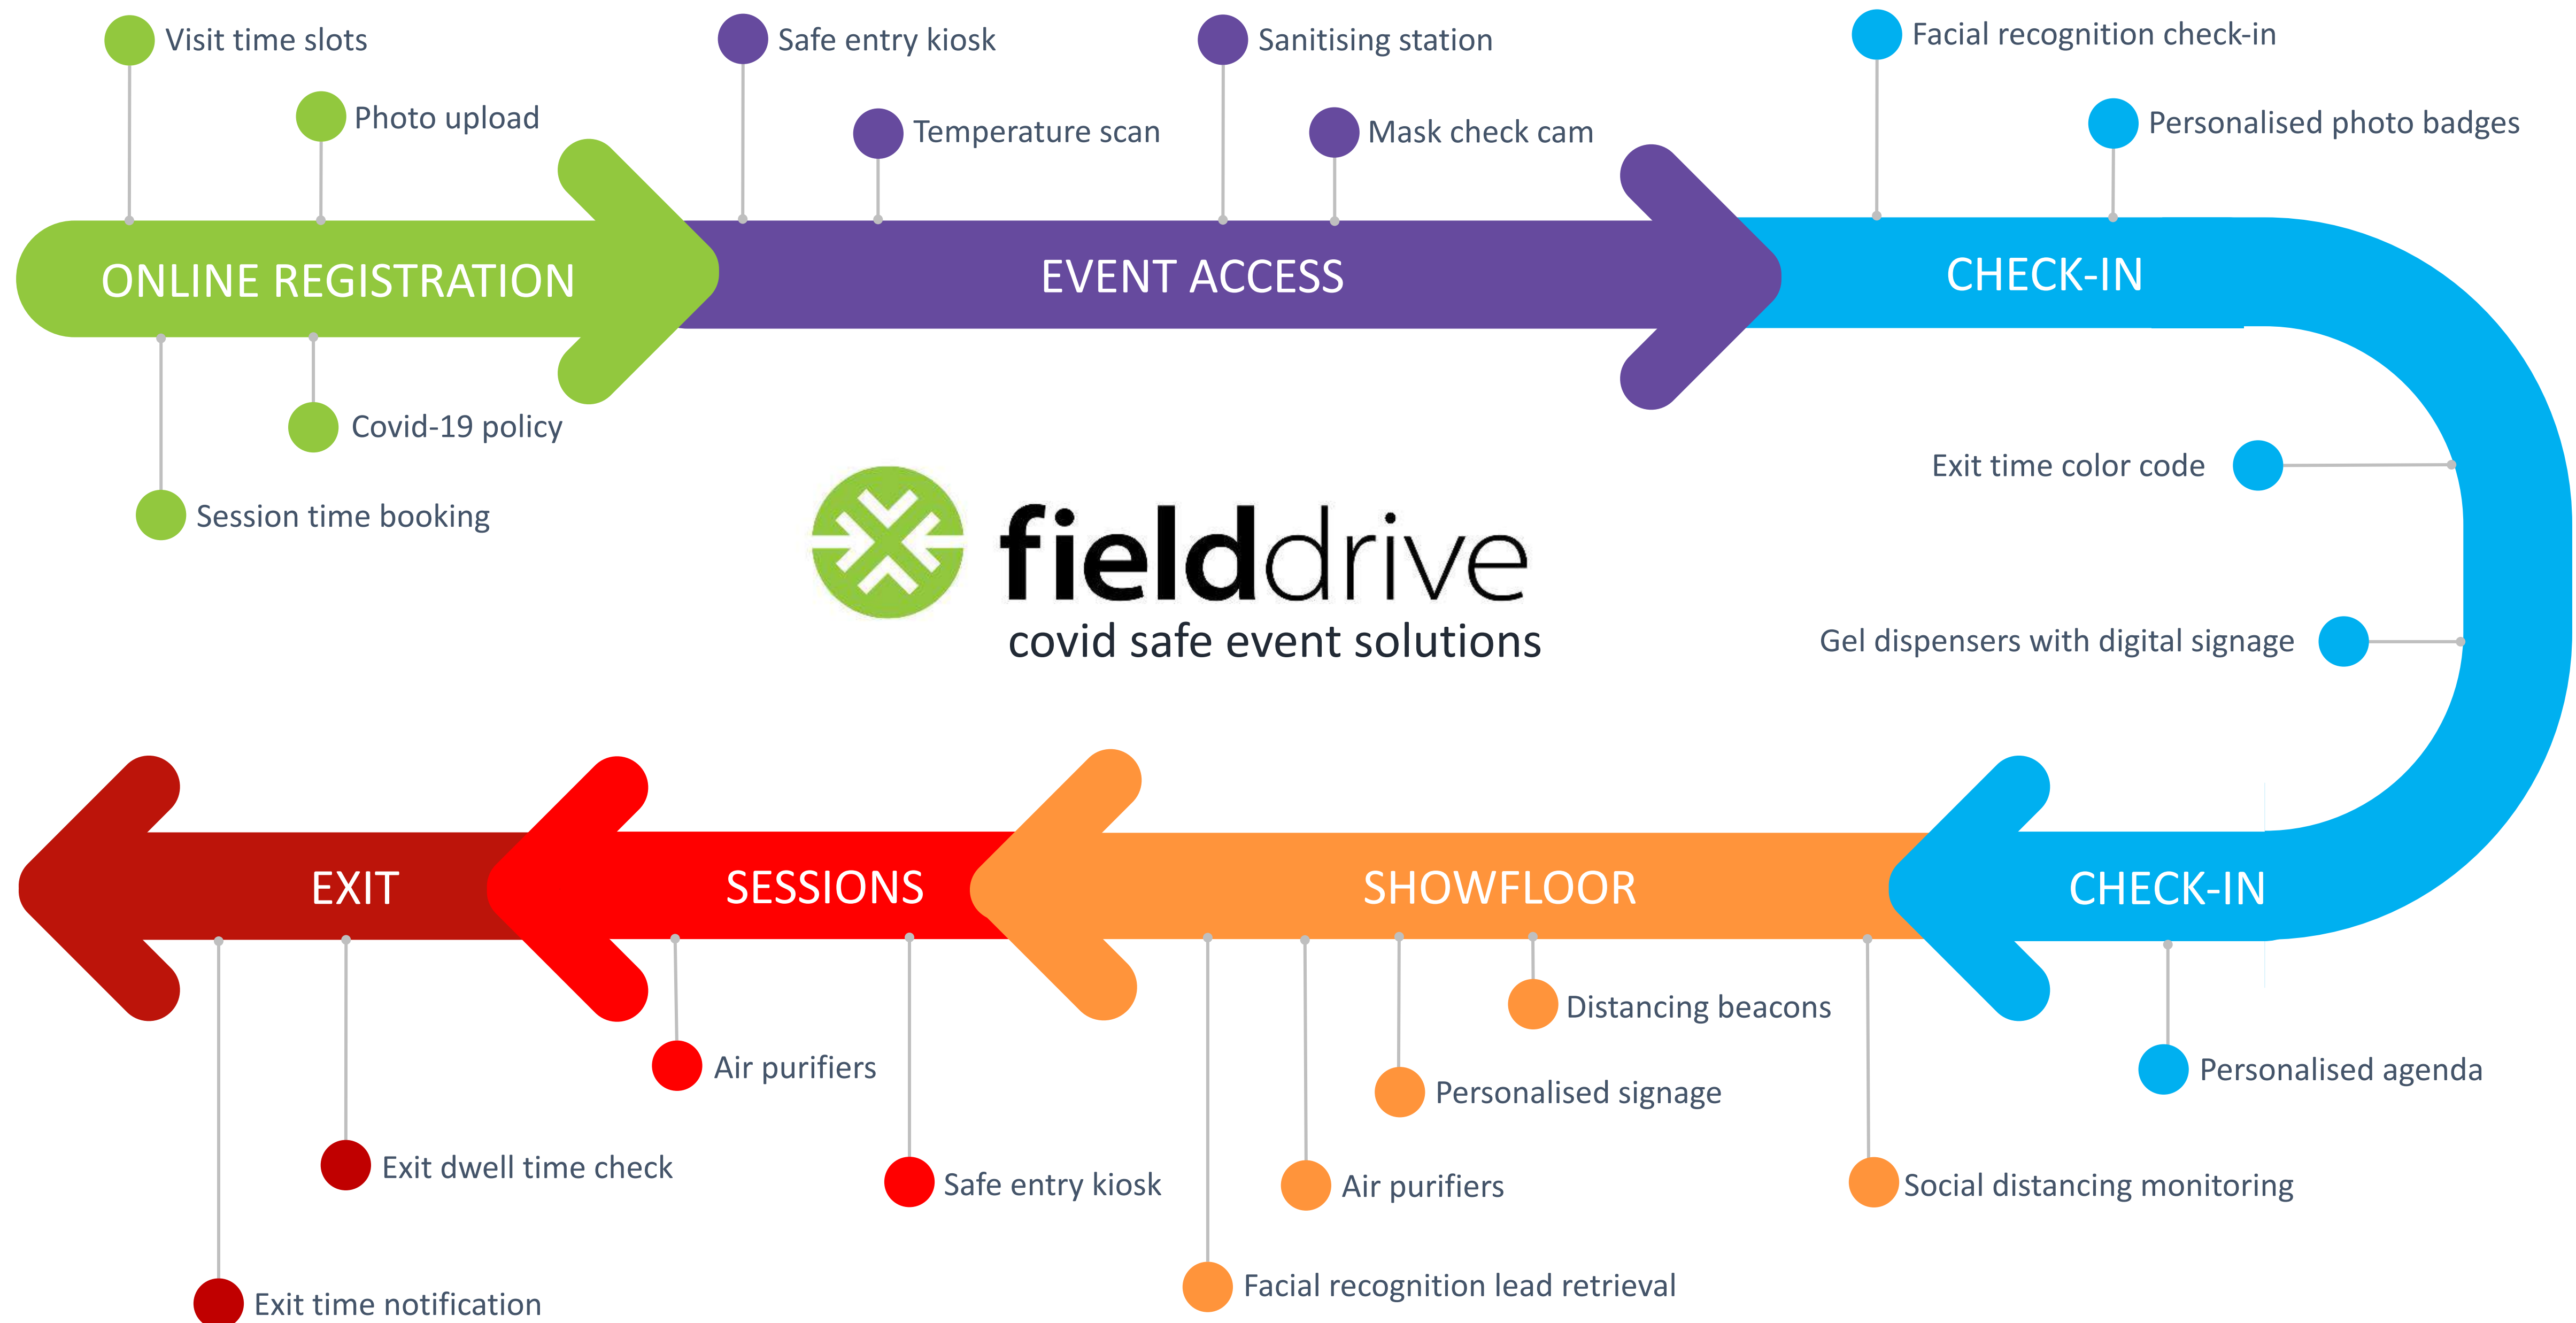

Dominika Fudala – Head of Projects

Manages the project teams and key accounts.

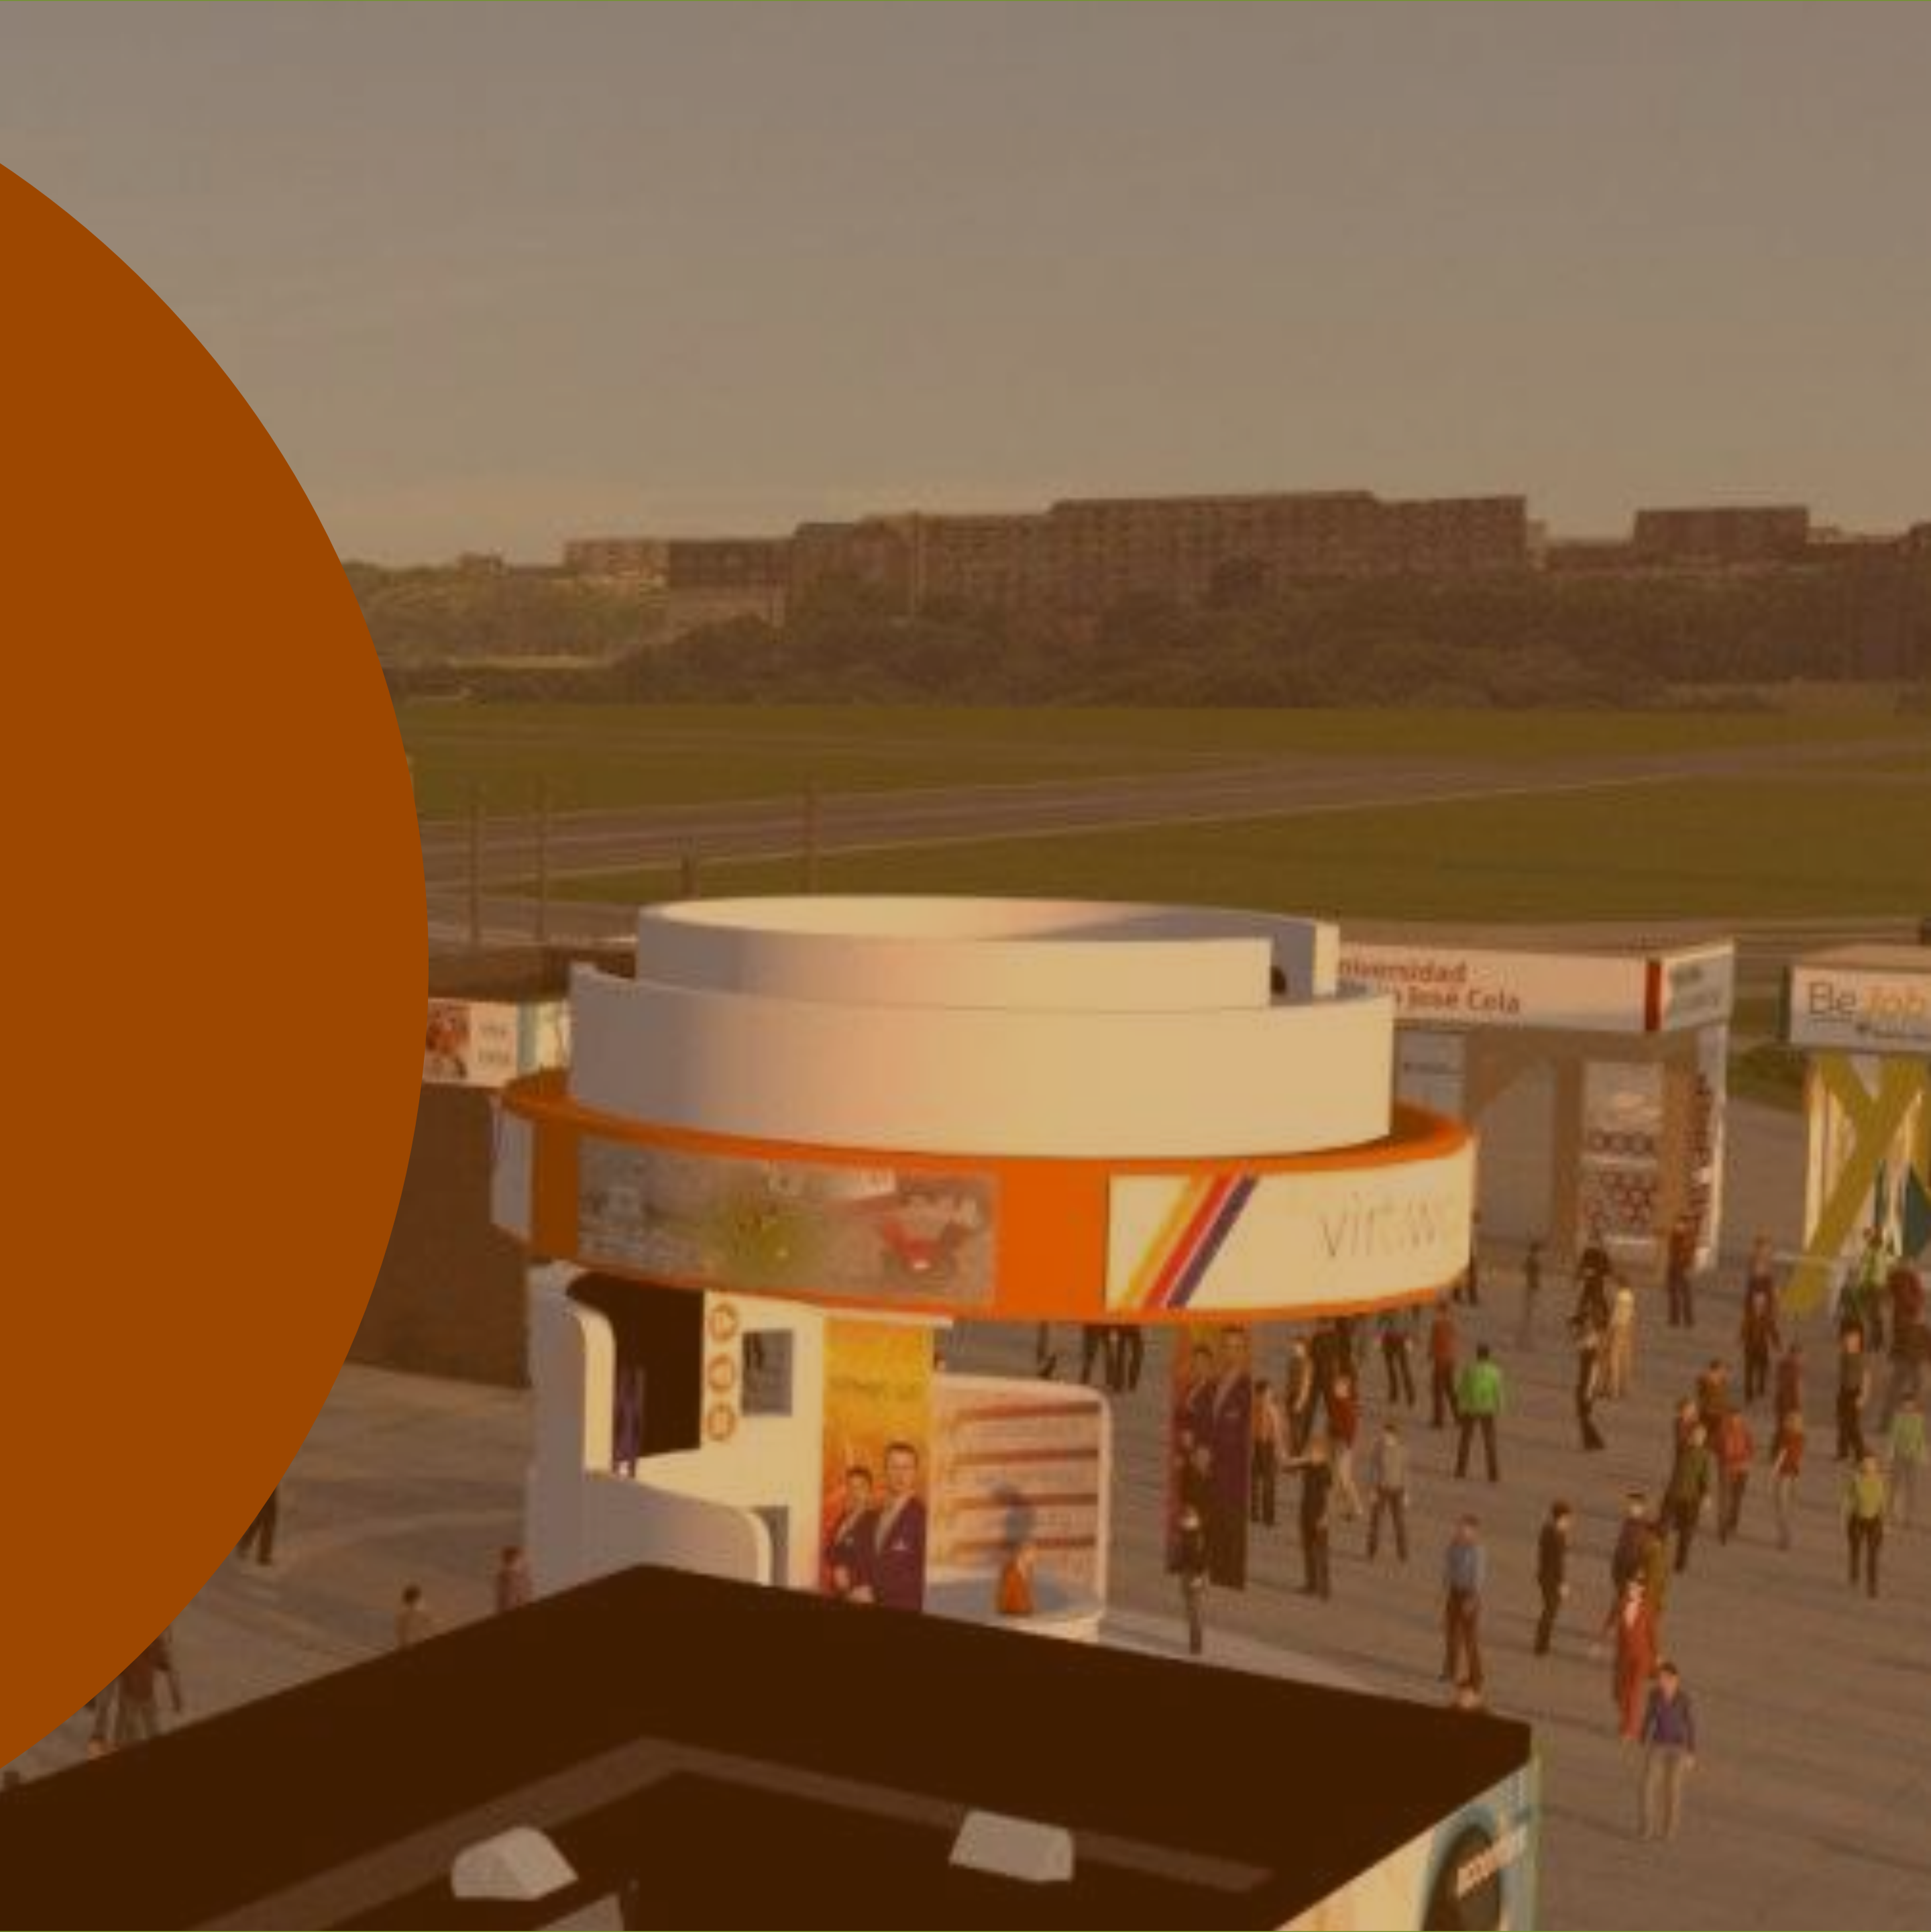

Covid safe event solutions

Virtual and hybrid event support

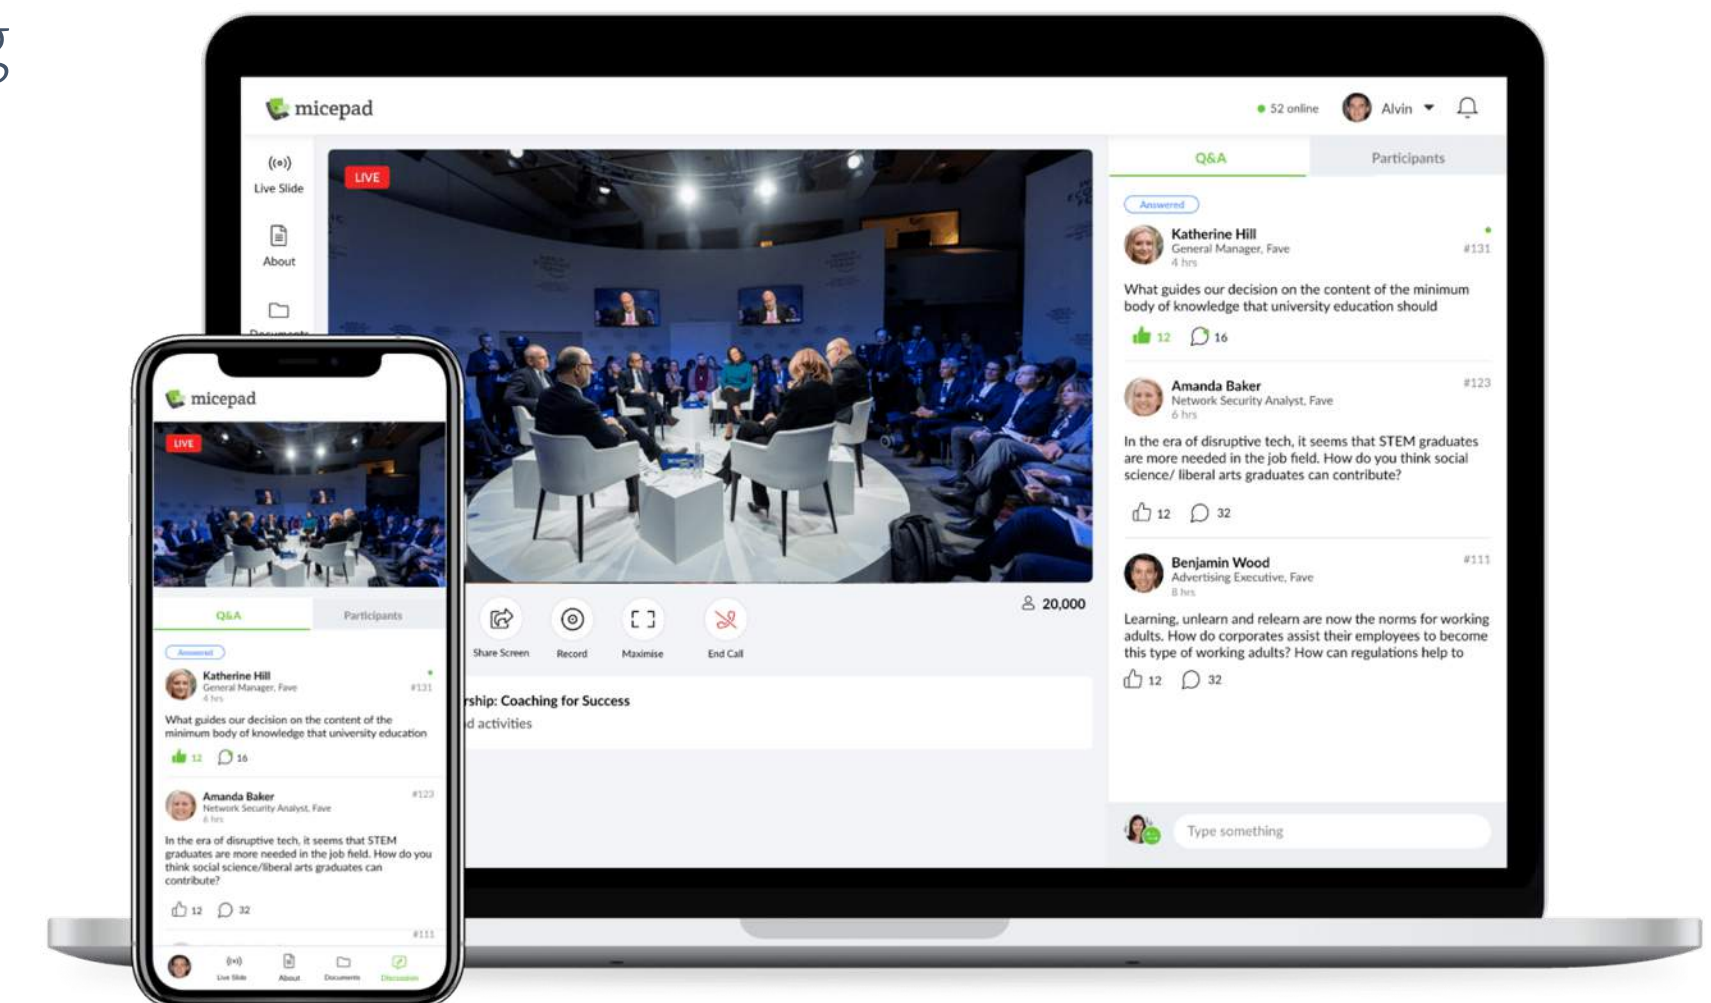

VIRTUAL AND HYBRID EVENT SUPPORT

We advise

fielddrive is **uniquely positioned to guide you:**

- **Agnostic:** we only have our clients' needs in mind, not a specific product to sell
- **Competent:** we recommend implementations across best-in-class virtualization tools and vetted platforms
- **Support:** we handhold our customers through the virtualization process, from scoping out their needs, documenting the implementation process, to assisting with project management and execution
- **Future-proof and scalable:** virtualization projects can extend to hybrid models, and provide customers with the flexibility to plan with physical events and convert to virtual/hybrid or vice-versa, with **the same project team** and contractual framework!

Onsite check in

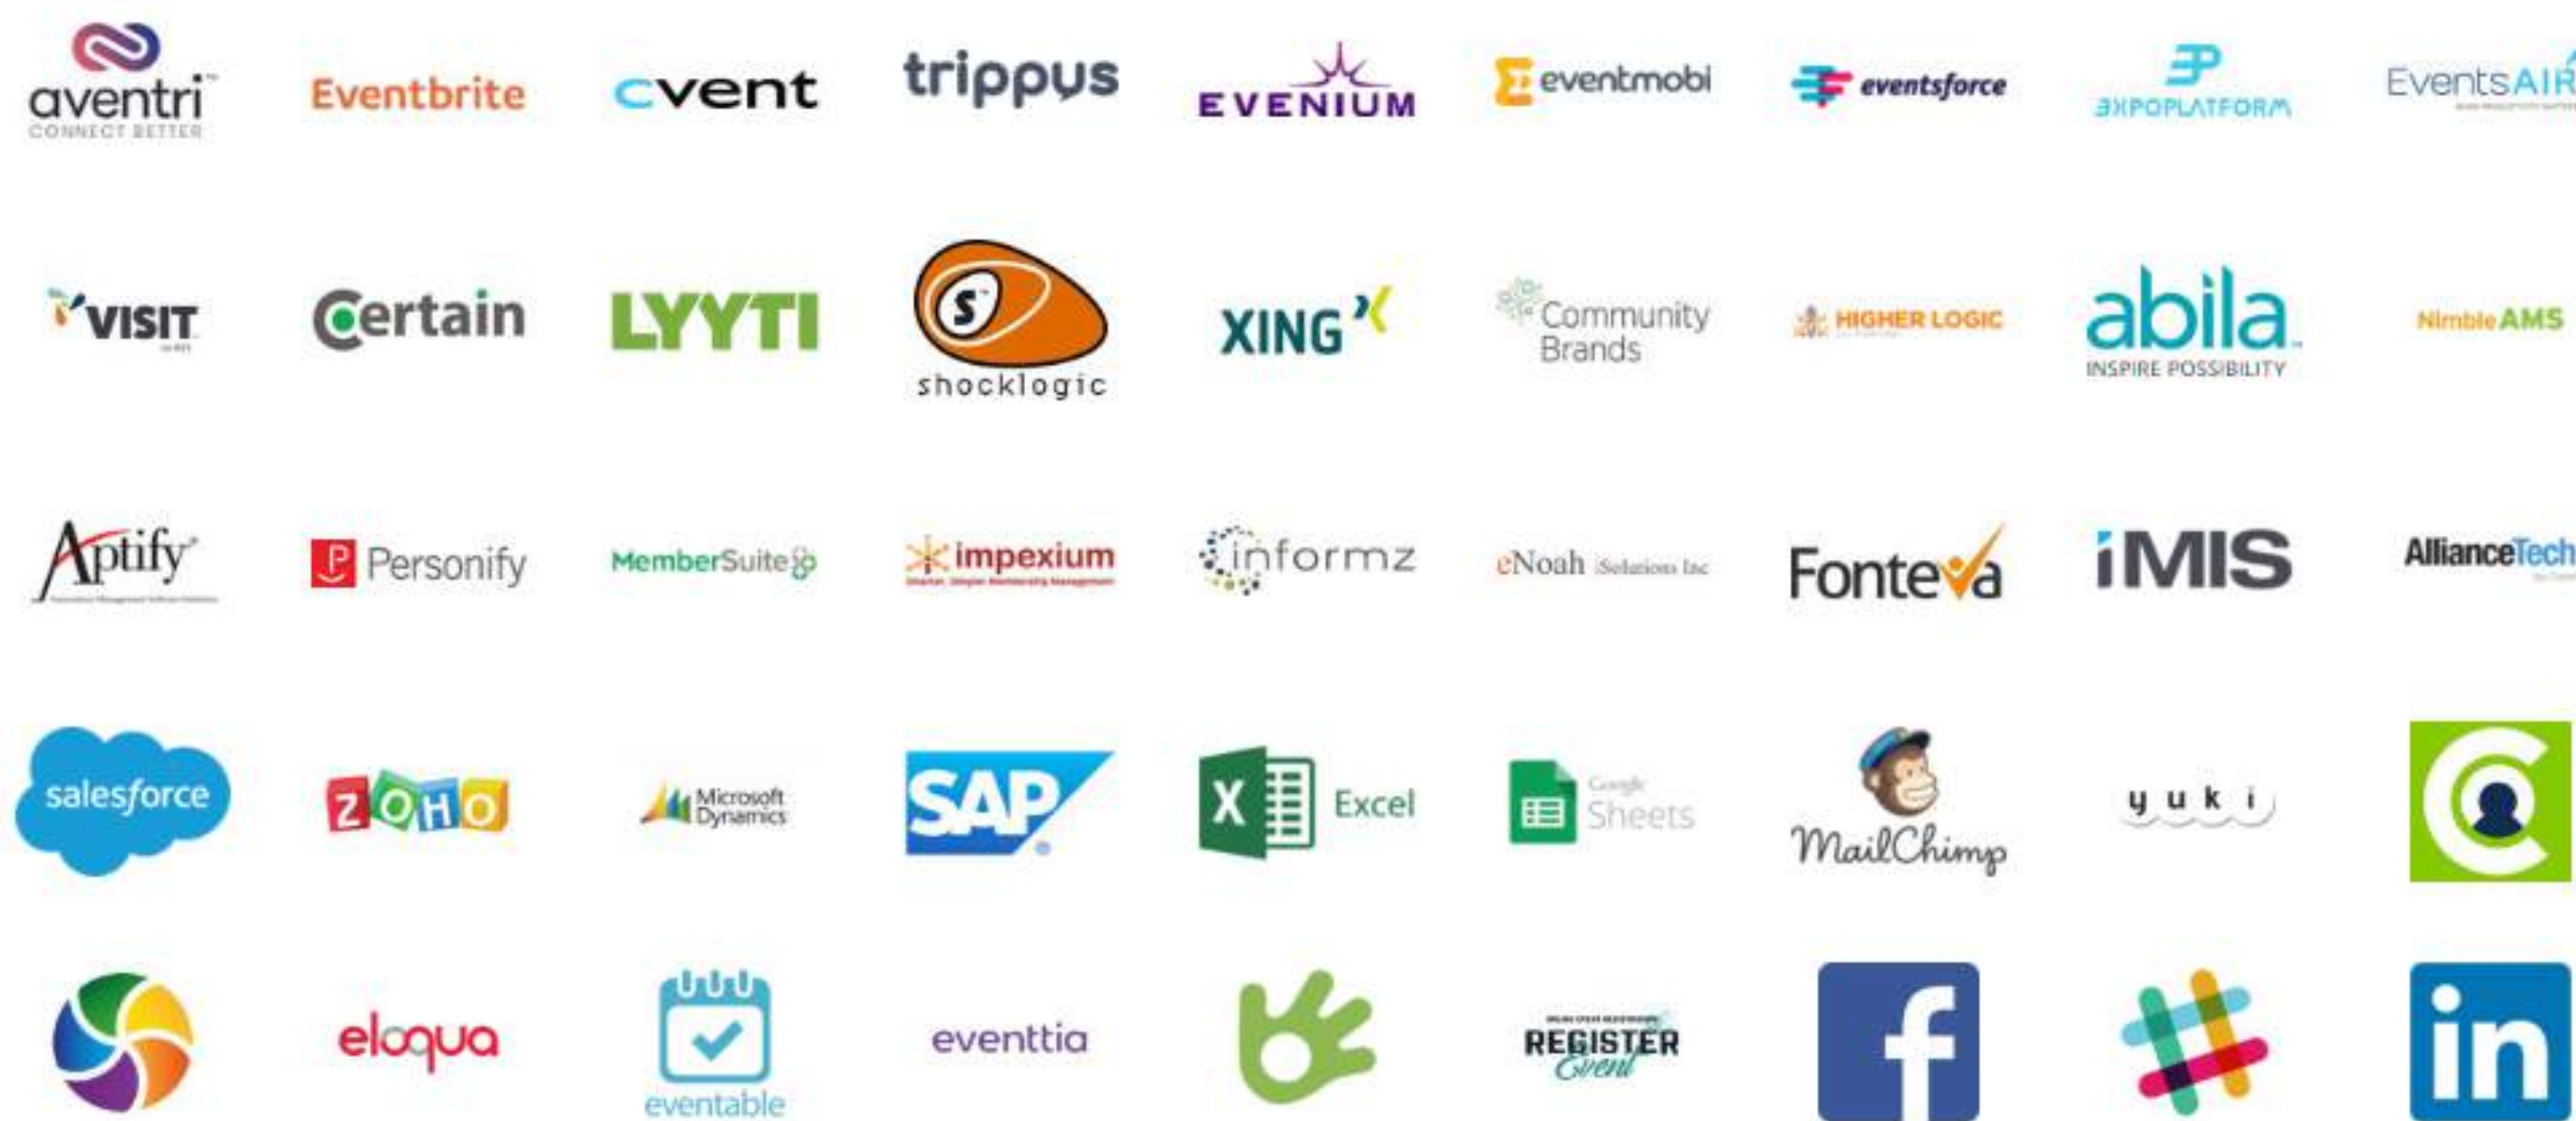

DATA INTEGRATION

Connect to any platform

fielddrive cloud software integrates with your database or registration platform, and delivers customized on-site check-in kiosks and badges, and supports attendee tracking technology.

This direct integration remains always in-sync: it allows you to keep online registration open, make last minute changes, accept walk-ins, print personalized agendas, colors and identification iconography on the badges

EVENT BADGES

BADGE VARIATIONS

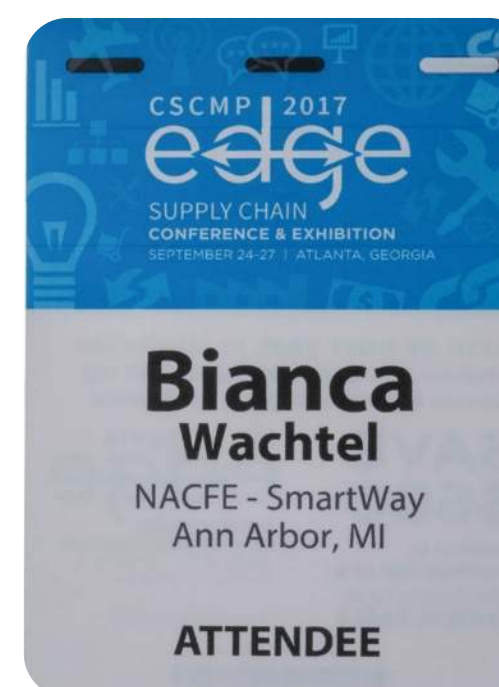

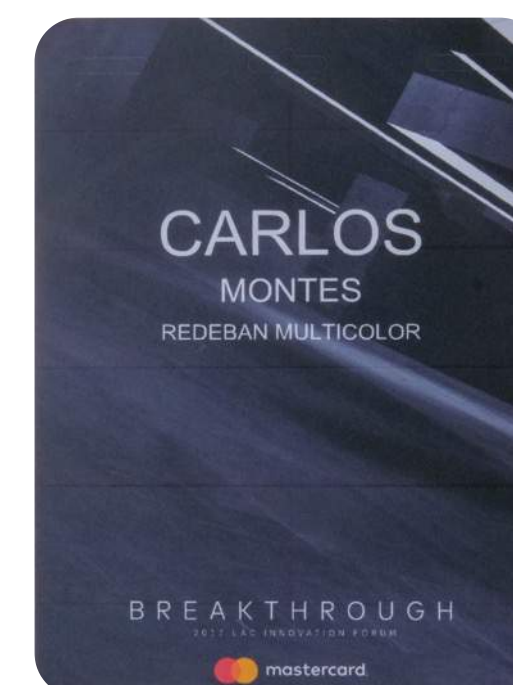

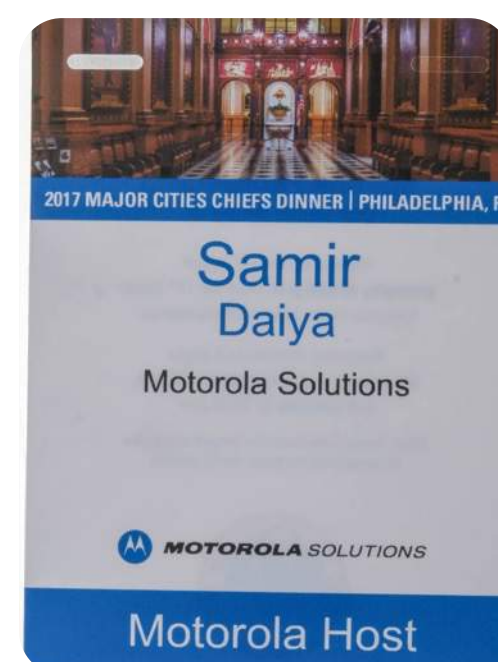

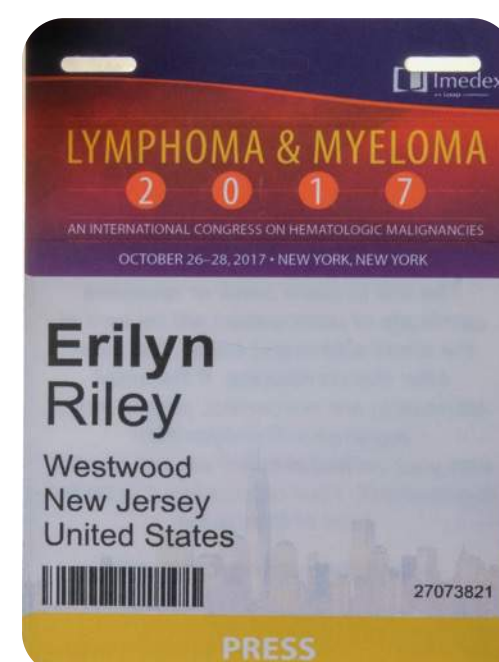

Badges are printed onsite, on blank eco-friendly and sturdy paper, allowing for full flexibility in personalization on the fly, with no constraints of pre-printing artwork:

- Different types, formats, and sizes
- Creative design options
- Dual-sided, full colour, edge-to-edge

- Leverage API integration for rich content
- Customize with personal agendas
- Individual seating assignments

- Differentiated attendee categories
- Ideal for Badge Advertising
- Maximise sponsoring revenue

ONSITE CHECK-IN

fielddrive kiosk

Each kiosk comes with pre-installed powerfull **Badgedrive** software and features:

- Flexible
- Compact
- Multi functional
- Out of the box
- Outage-proof (PSU)
- Ready-to-print in 5 mins
- Works either online or offline
- Front or back facing
- With or without hospitality team
- Up to 250 badges / hour
- Touch screen to operate
- Printer for live badging
- Keyboard for look-ups
- Webcam for face recognition
- Scanner to facilitate self check-in

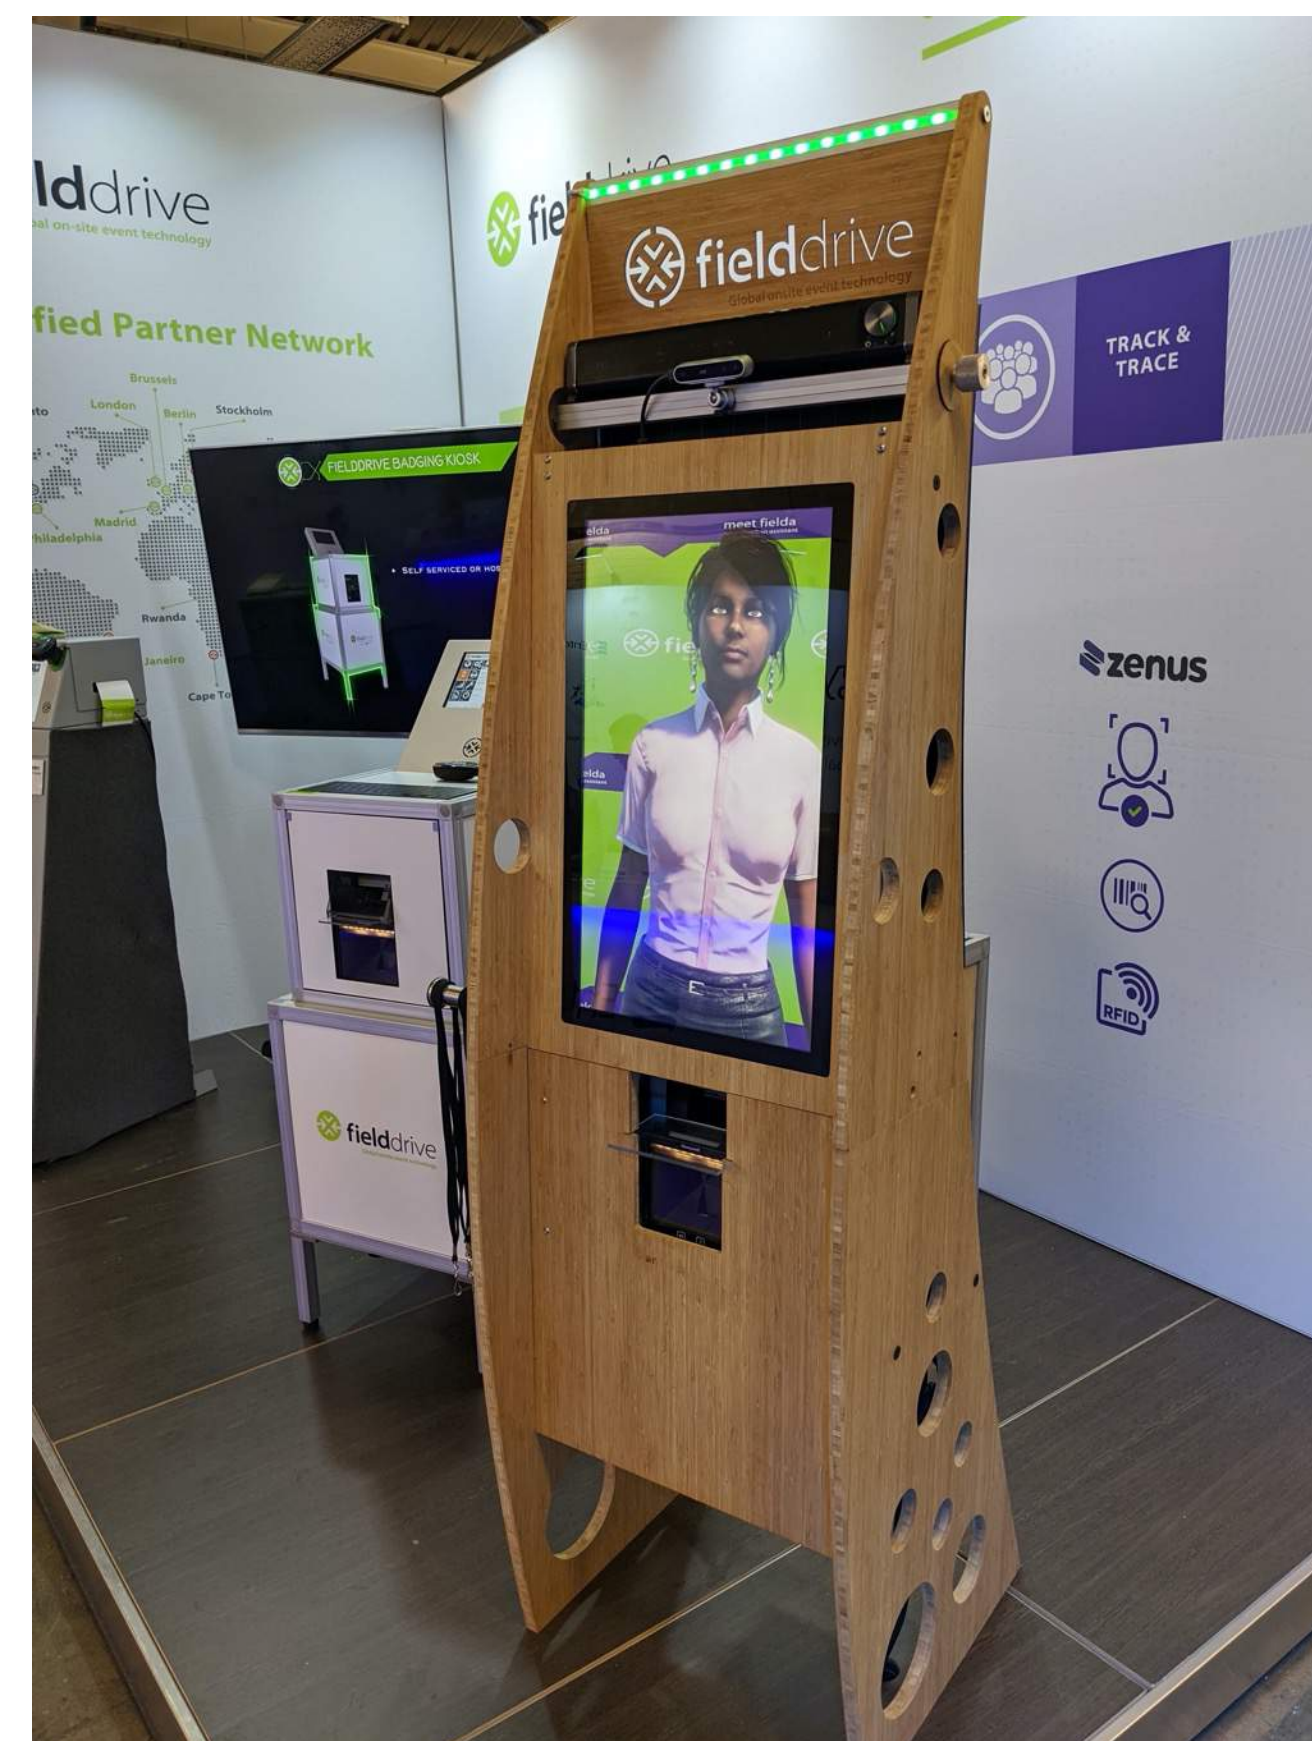

ONSITE CHECK-IN

Any configuration or set-up

Our modular kiosk concept aligns with any event environment:

- Standalone
- Countertop,
- Full registration desk (includes 2 kiosks),
- Premium wood-like encasing (made of bamboo)

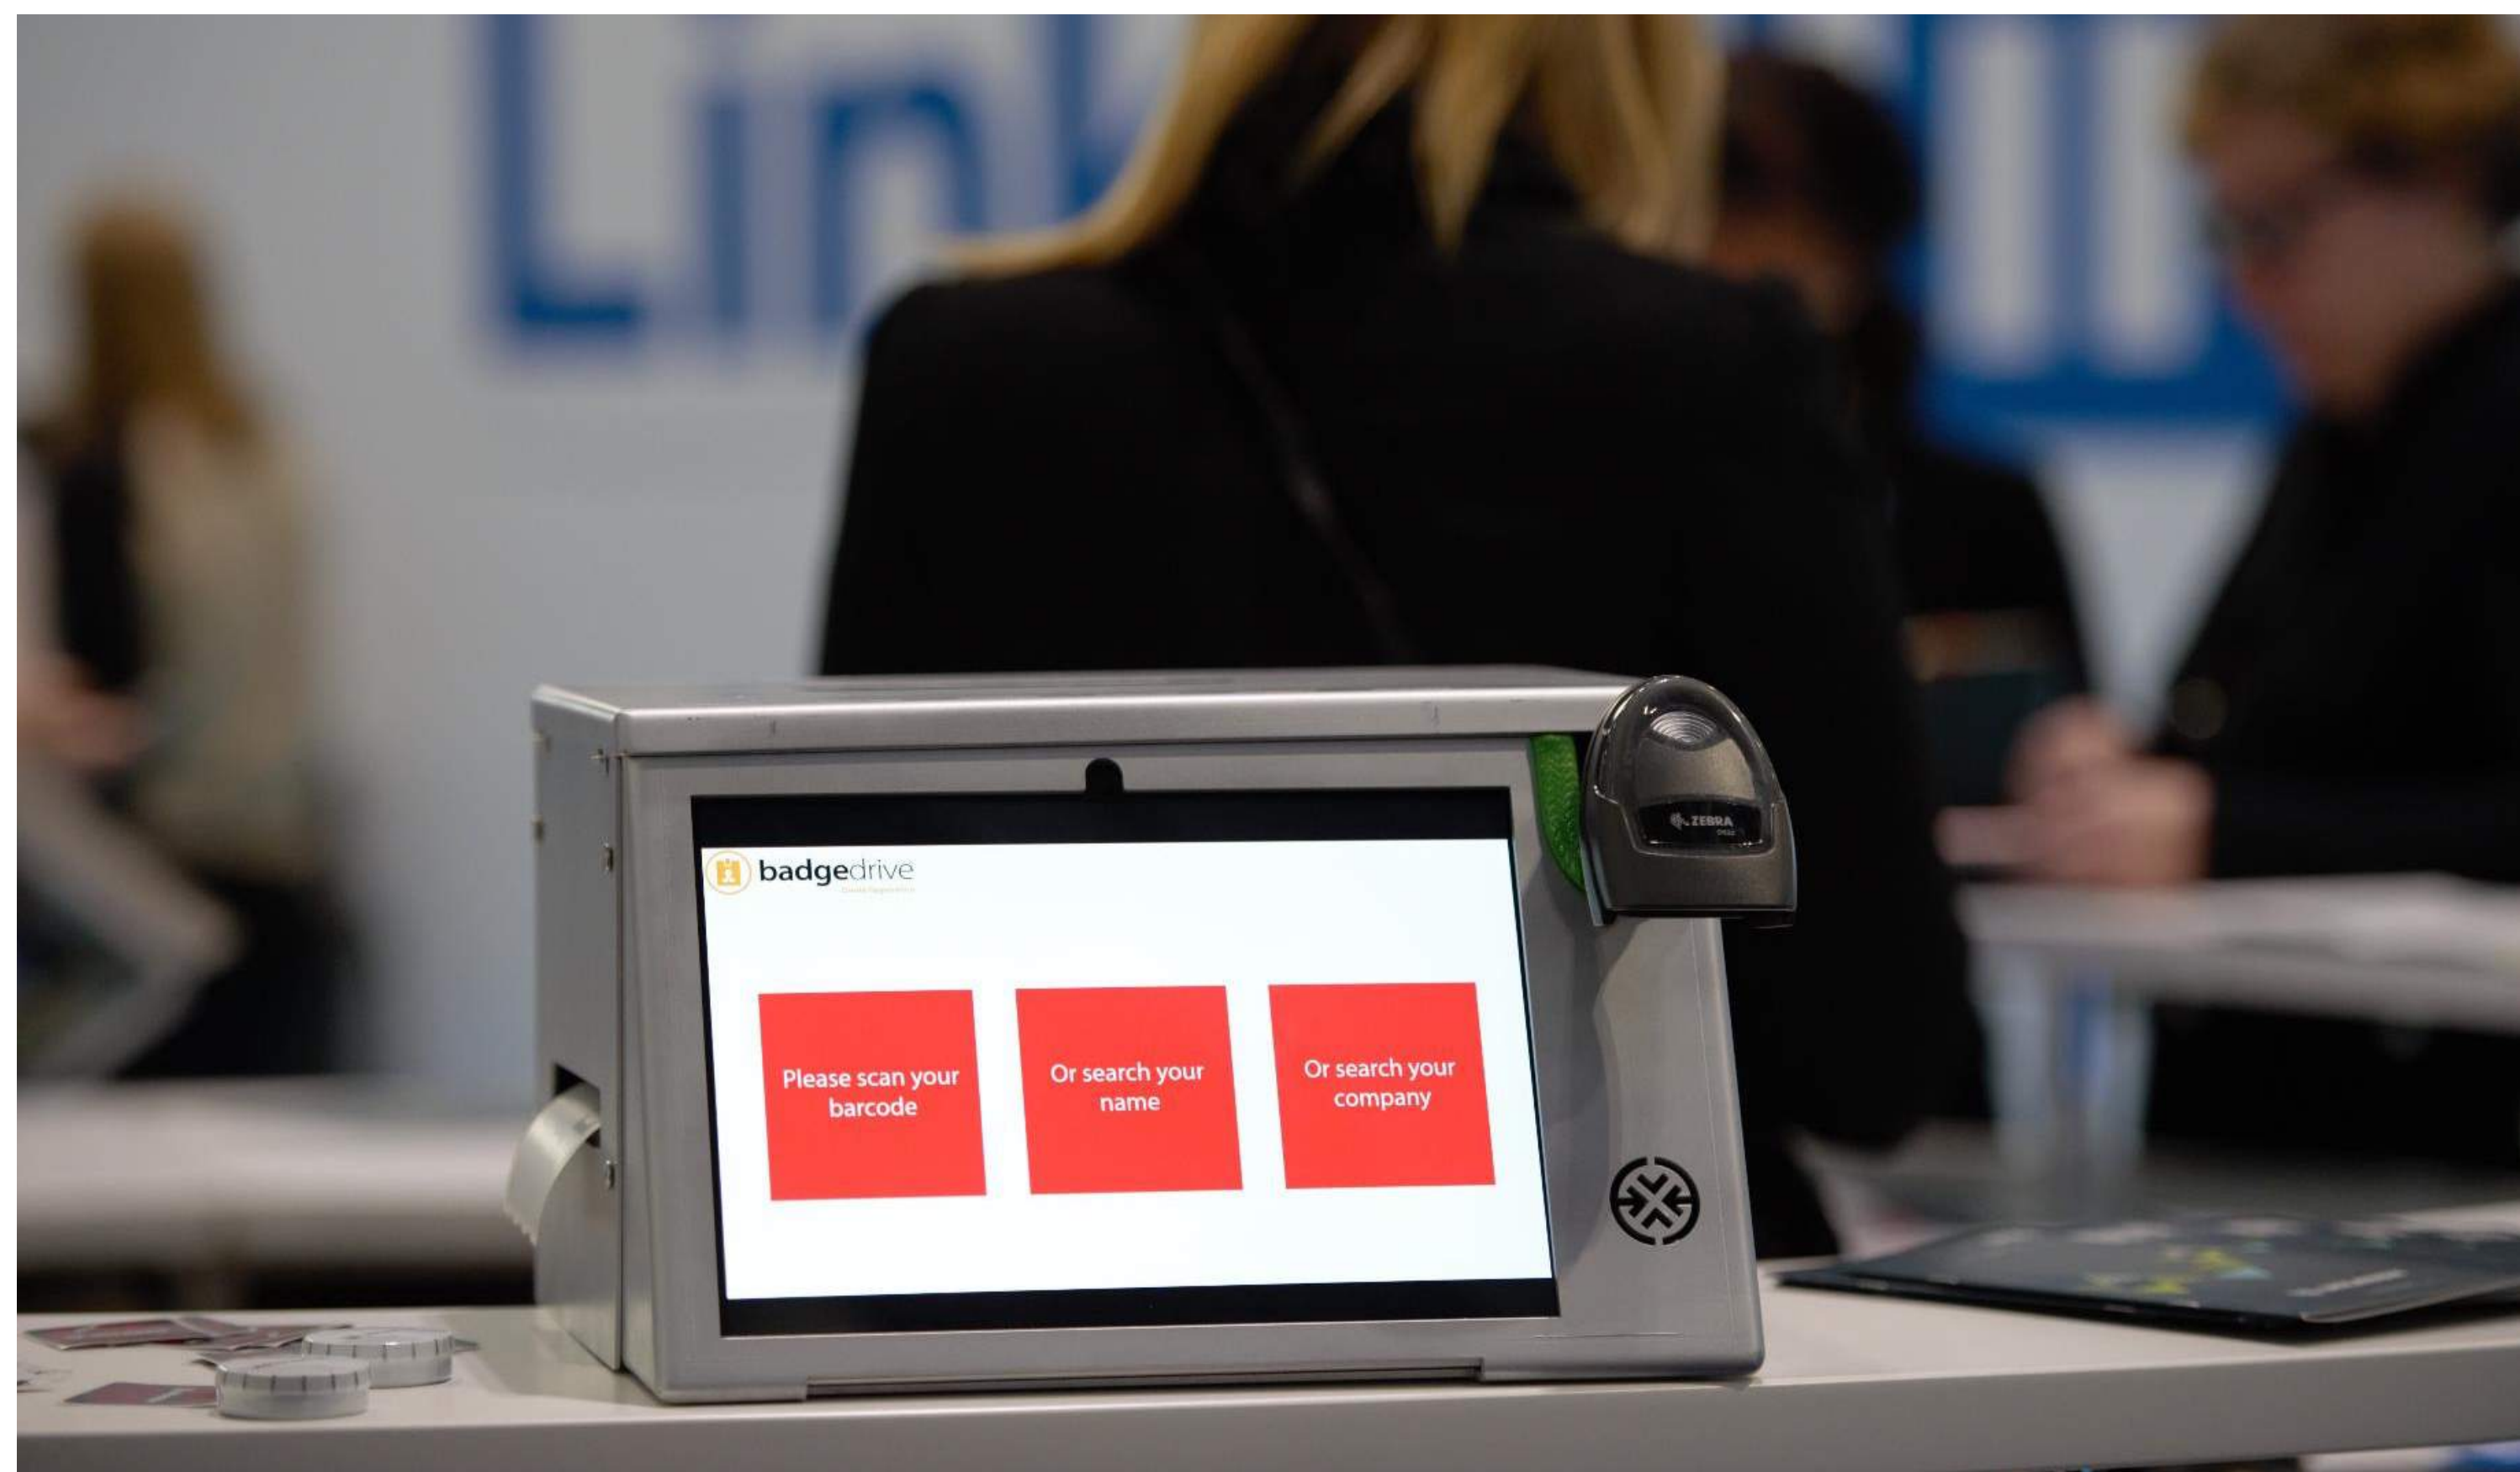

ONSITE CHECK-IN

Badgebox

Badgebox is **fielddrive's ultra-portable badging solution** for small events up to 500 attendees, and features:

- Microsoft Surface Pro
- 2D Barcode scanner
- On-screen keyboard for name look-up
- Handy carry-on bag
- Various printers can fit in same housing:
 - ✓ Zebra ZD 420 (thermal badges)
 - ✓ Evolis Zenius (credit card)
 - ✓ Dymo Labelmate (thermal label)
 - ✓ Toshiba B-EV4T (textile label)

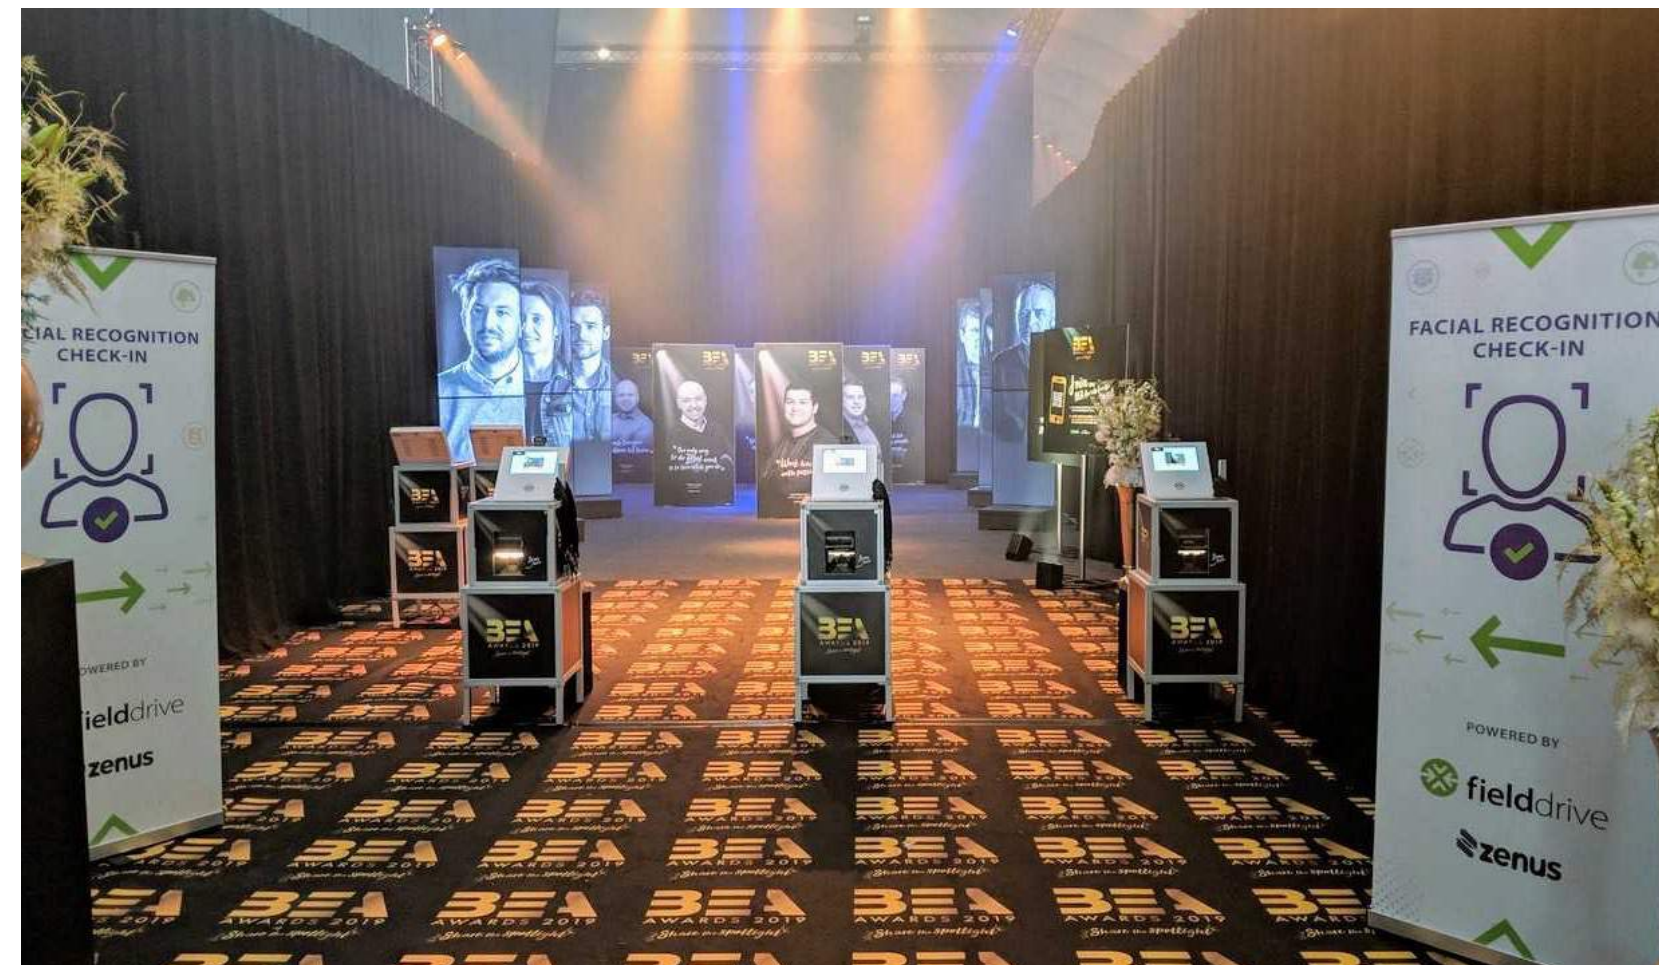

Setup examples

Set-up examples: walk through or front-facing

Track and Trace

TRACK & TRACE / EVENT BADGES

Facial Recognition

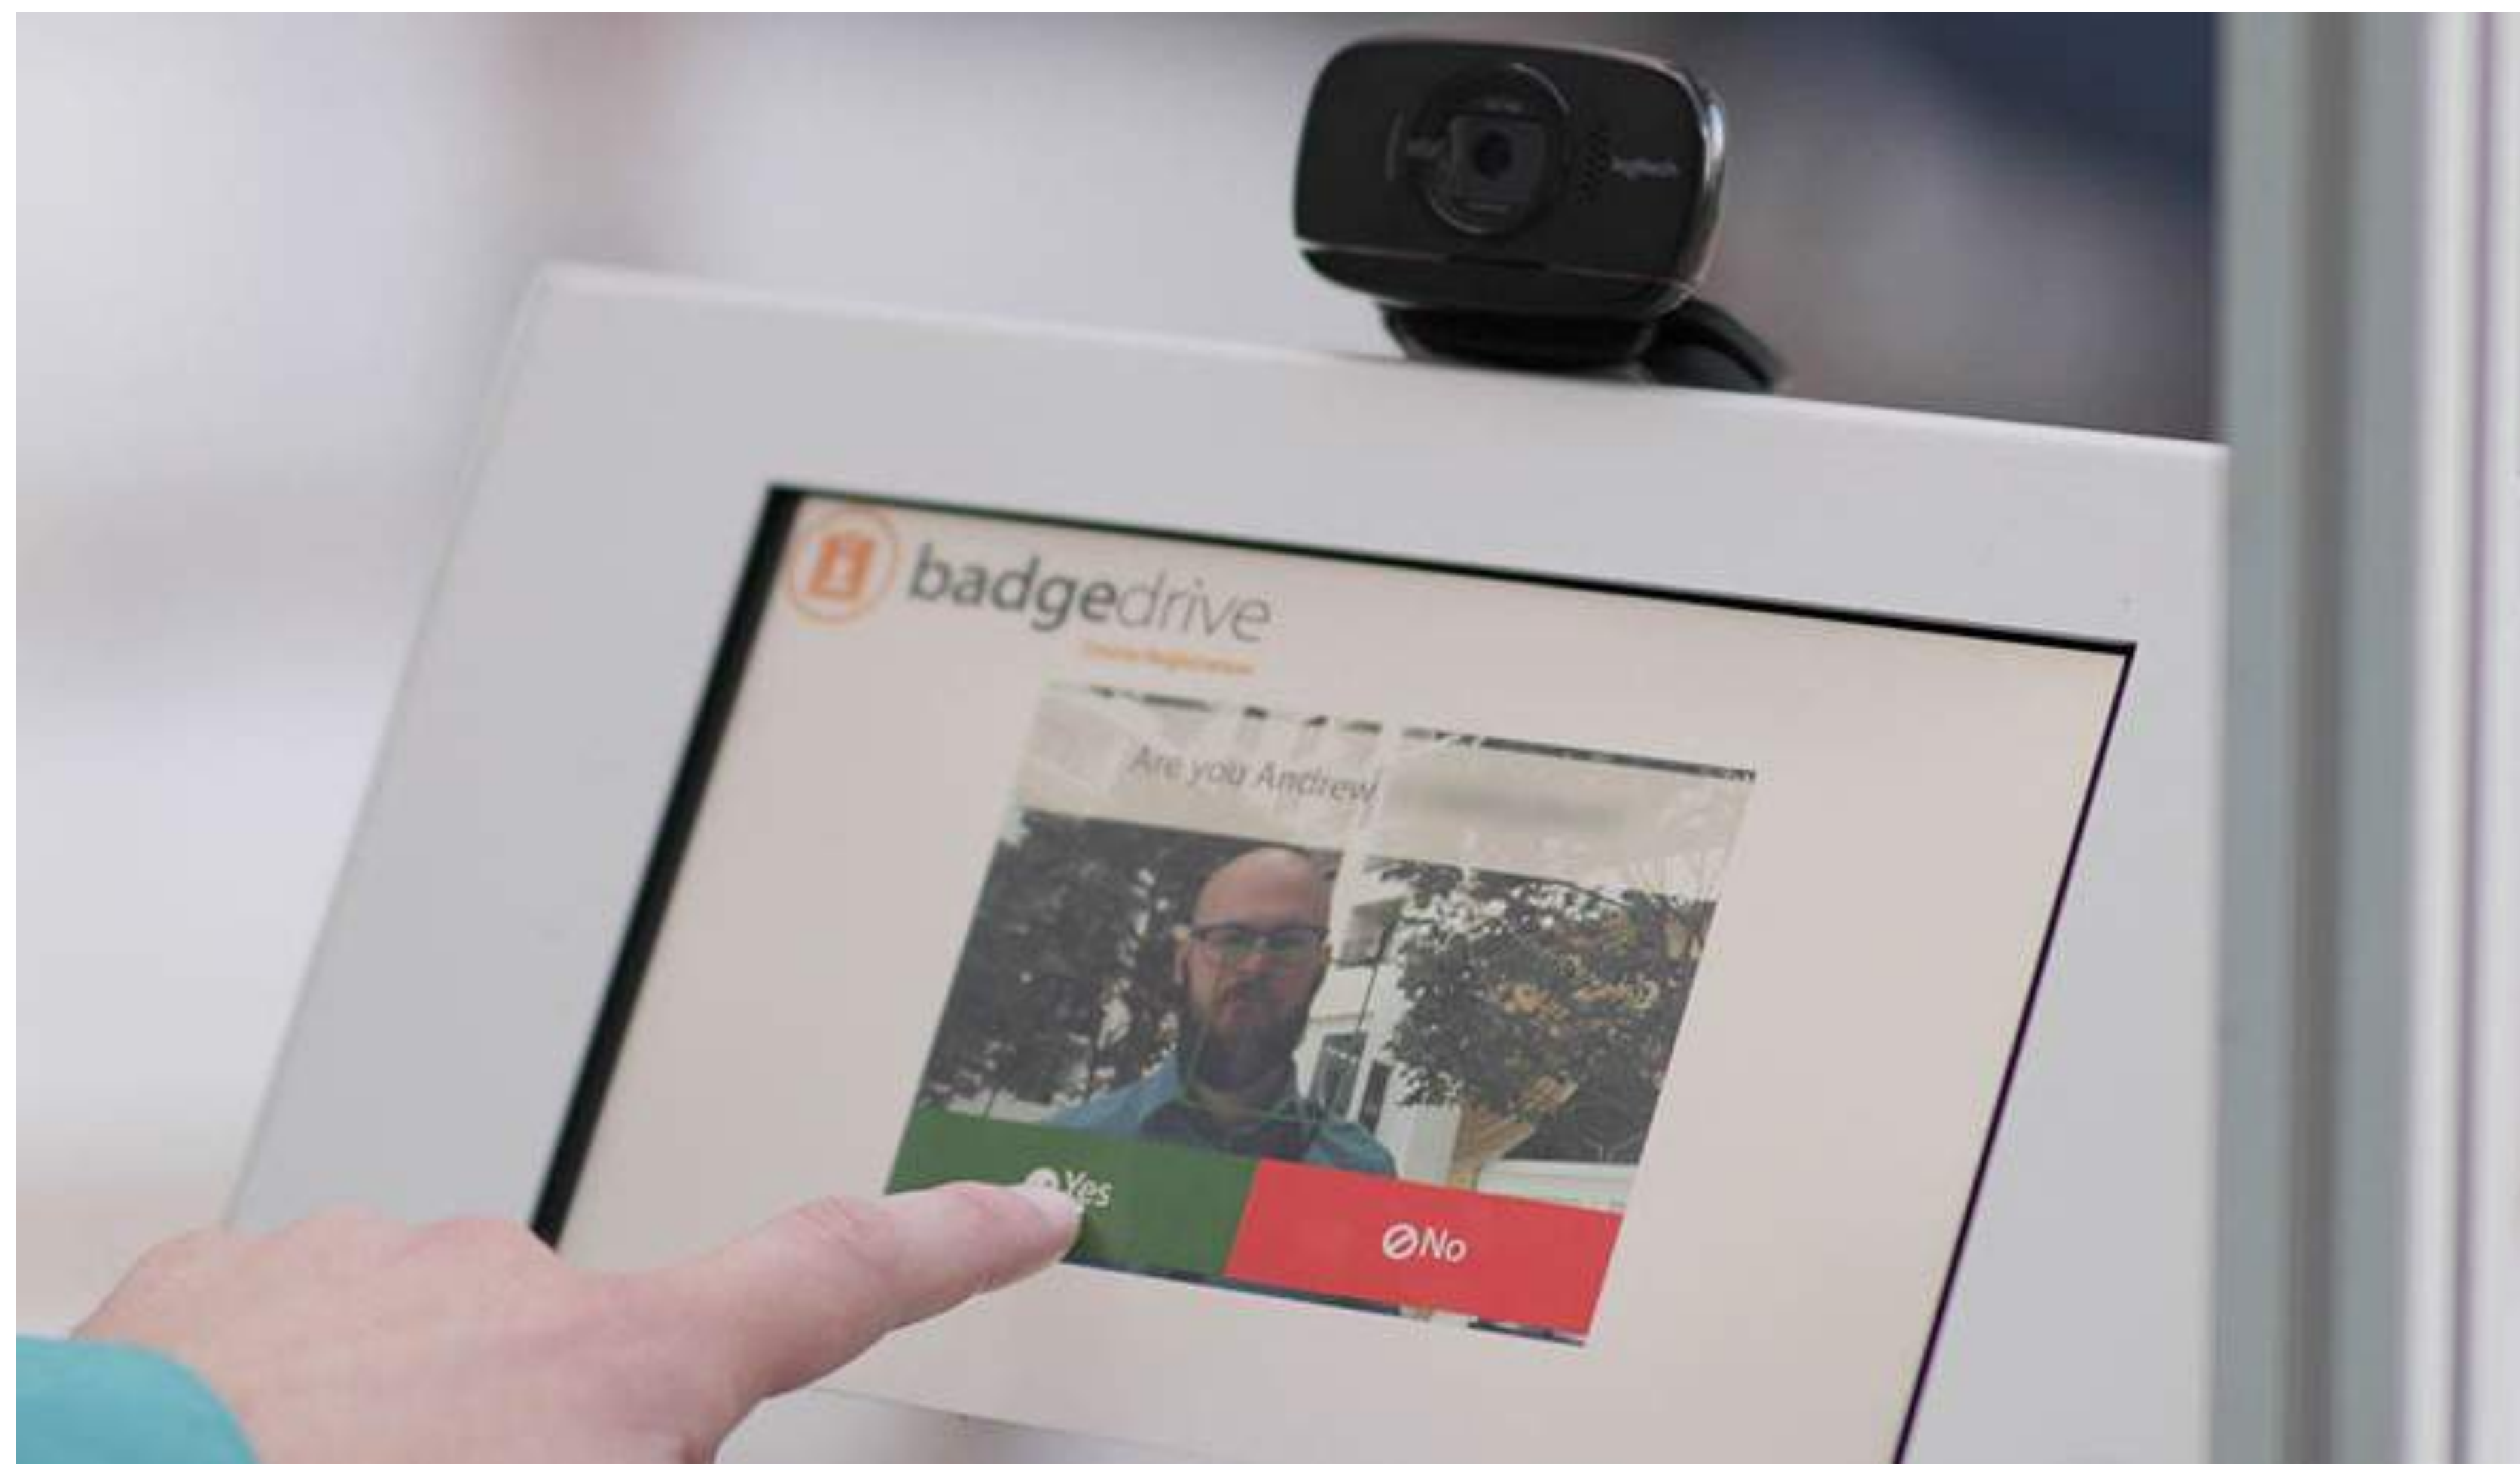

Fielddrive was the first company to globally deploy successful and efficient facial recognition technology in the meetings and events industry.

This exciting technology allows attendees to check into events using only their face: ***'your face is your ticket'***

Shorter wait times, more secure meetings, and personalized attendee greetings are just a few of the benefits facial recognition provides.

We are now also expanding functionality and use cases to further delegate interactions throughout the event (access control, audience engagement, visitor flow, etc..).

TRACK & TRACE

Passive or Active

- **Identified tracking:**

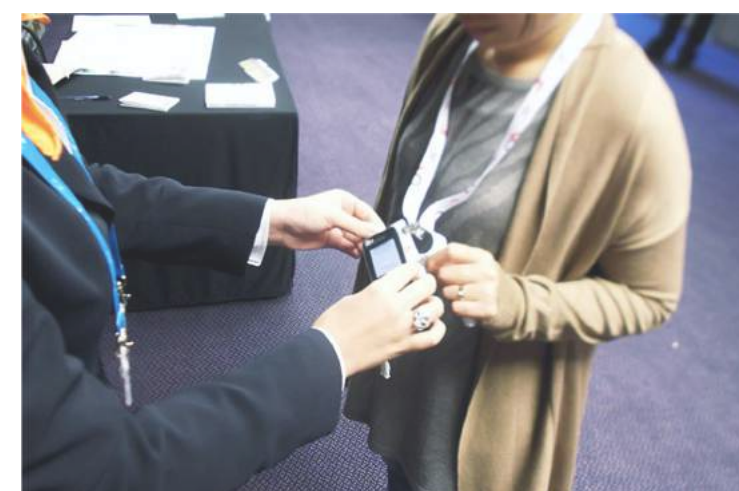

Passive tracking:

- RFIID (tag)
- Beacon (lanyard)

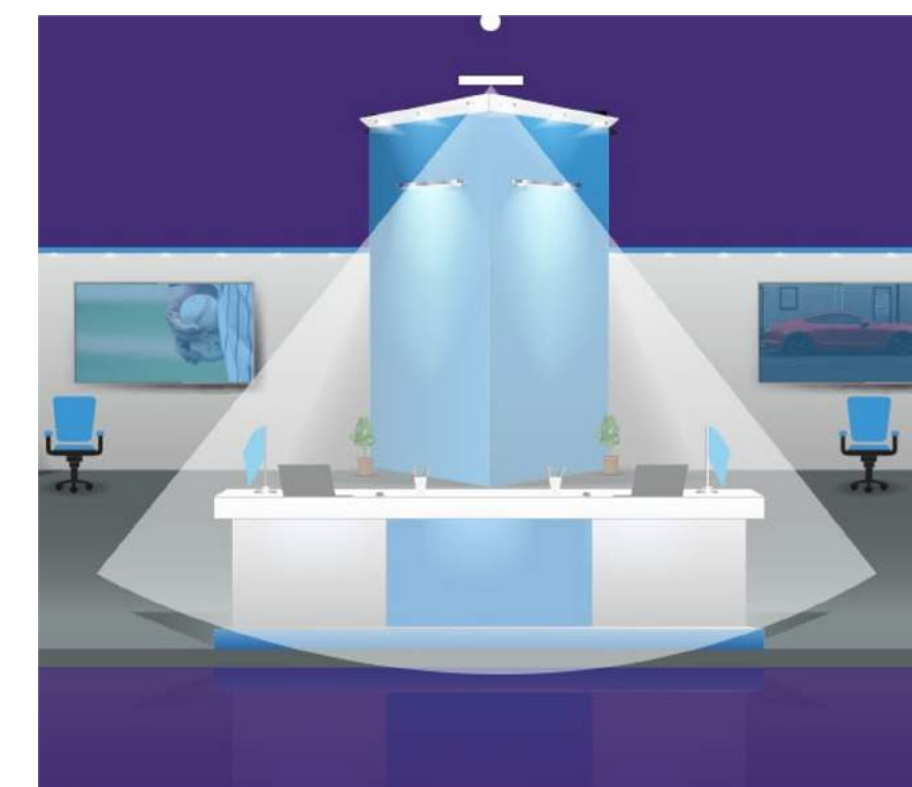

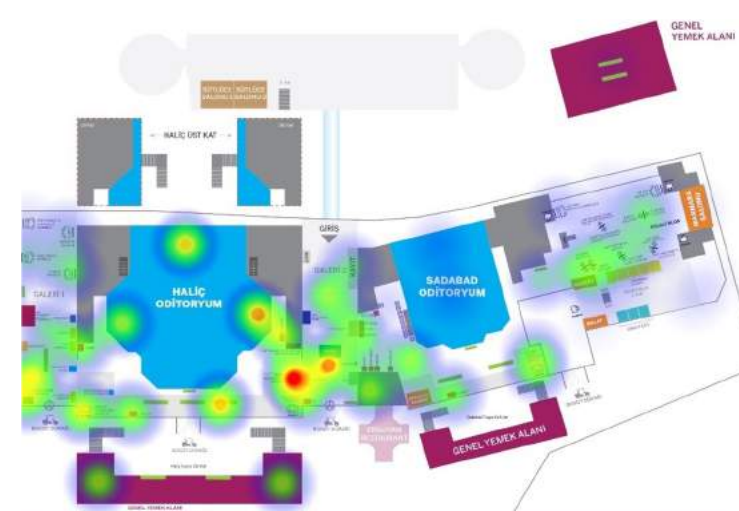

Active tracking:

- NFC tap-in (tag)
- Handheld scanners (barcode/QRcode on badge)

- **Anonymous tracking:**

Combination of Aperture, Apex, and WiFi sensors with facial recognition

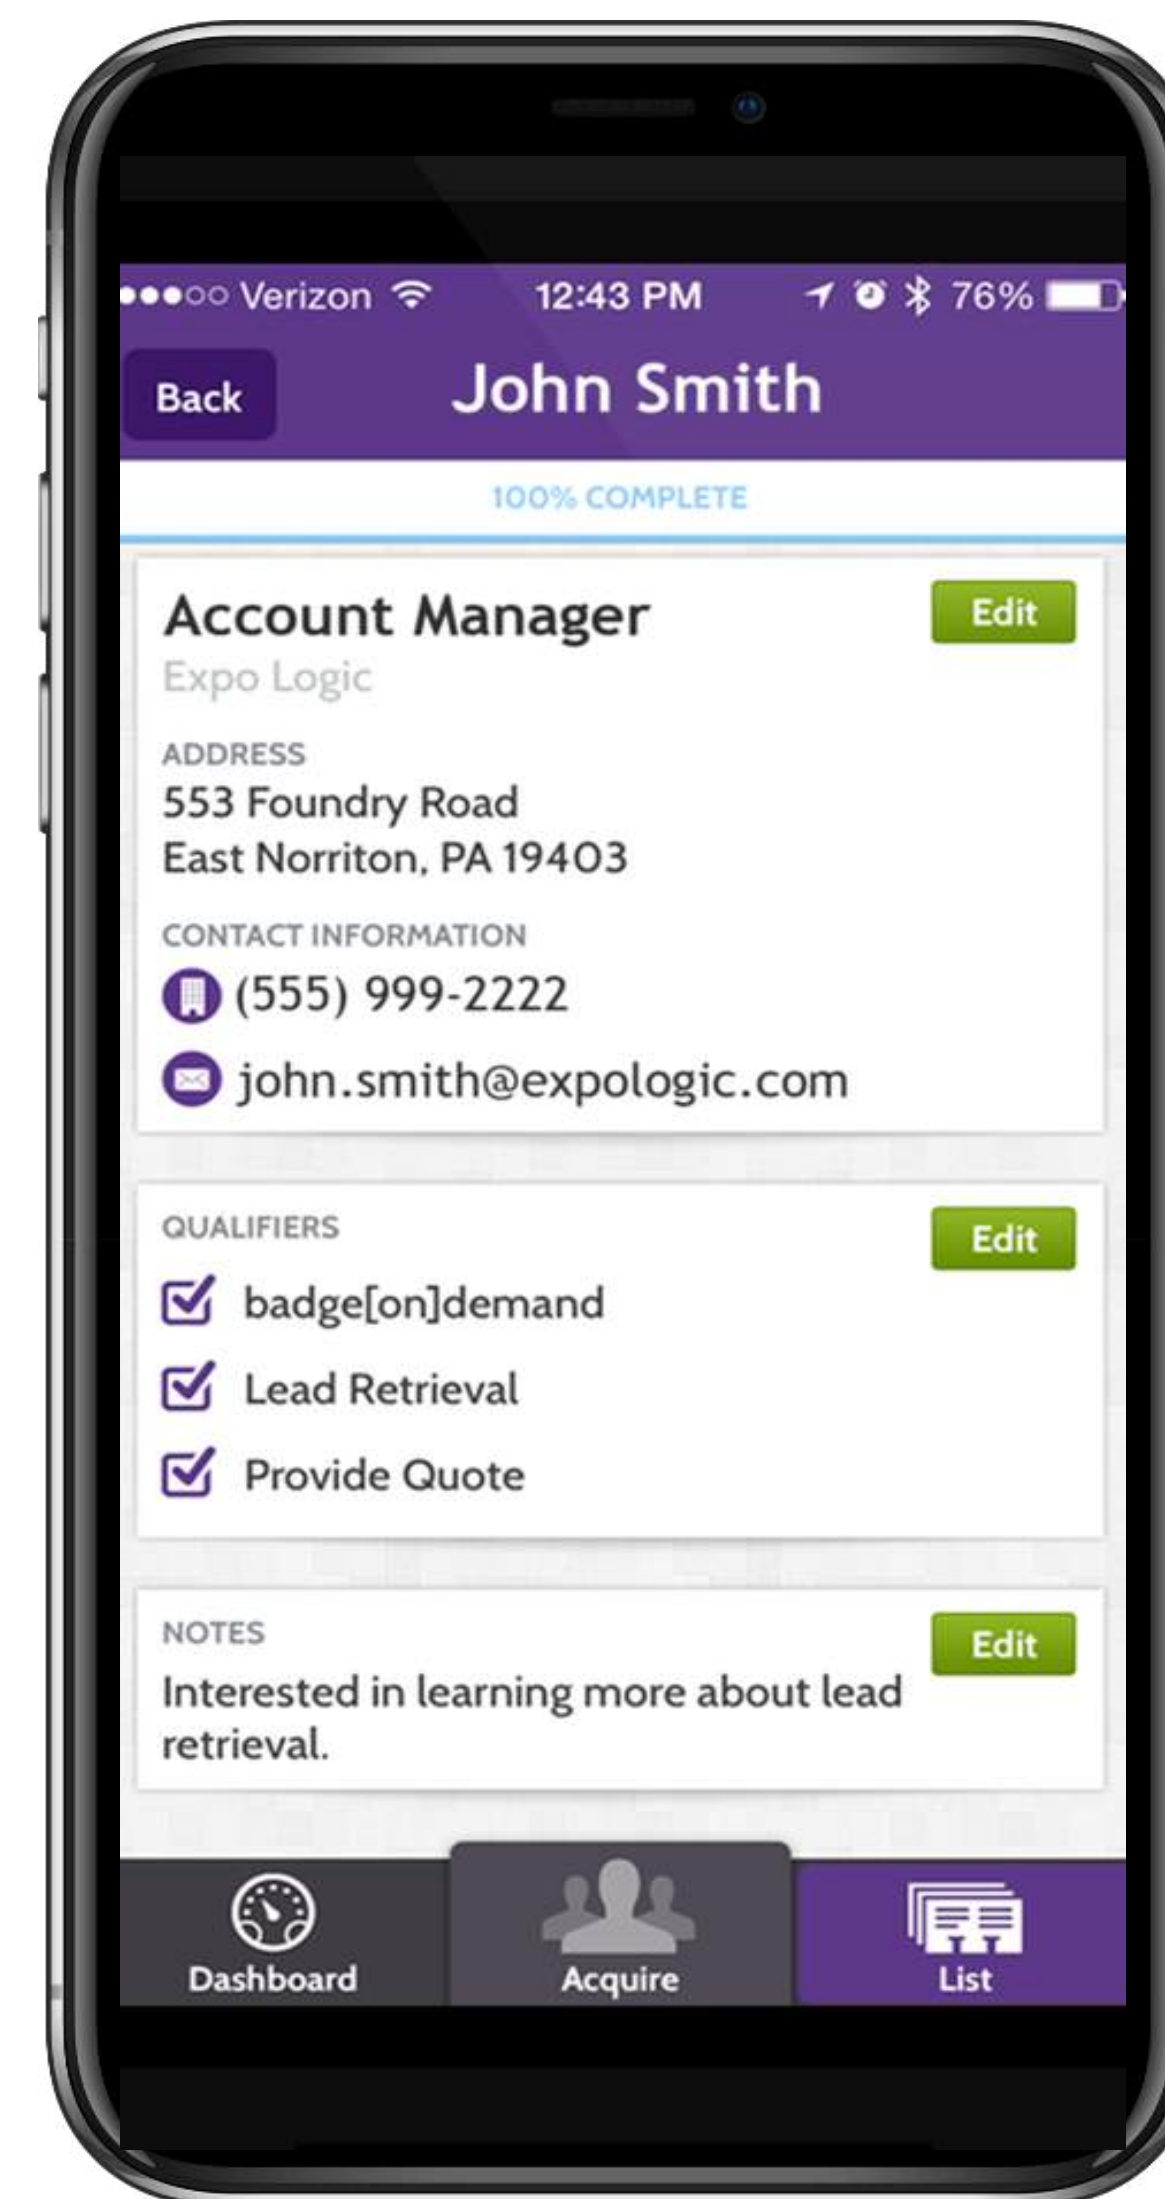

TRACK & TRACE

Lead Retrieval

- Exhibitor app for Apple and Android devices.
- Collect delegate data from visitor badges.
- Add notes, custom qualifiers and additional information.
- Send documentation straight from your mobile device.
- Keeps your data secure in the cloud exhibitor portal and can also work offline.

Thank you
